For The Tribune. THE HOWARD HOME .- It is a common complaint of the Visiting Committees of the various benevolent societies, that the means and clothing lavished in certain quarters of the Sixth Ward, are thrown away. The whole atmosphere seems filled with vice and misery, and honesty, when placed there, soon becomes corrupted and dies. A great reform is now going on there. The Temperance Societies are exploring the repulsive and unwholesome dweilings that enfold and hide the scepest suffering and lowest degradation the human mind can fancy, and persunding the wretched inmates to return to reason and deceacy. Many families more unfortunate than criminal, have been driven by want to take refuge in the garrets and cellars of this outlawed region, and once there it requires more than ordinary effort to rescue them from certain destruction. Every thing around them urges them to vice-nothing invites to virtue. The neighbor who cannot and will not offer them a morsel of bread, will bring in a broken tea-cup a share of the rum he has piedged his last coat to buy. We have seen a sick widow lying in the same bed with her sick child, in a dark, damp cellar, refused a piece of bread because she would not suffer her fever-stricken babe to drink rum and water " to strengthen it," when it was proposed by a fellow lodgerherself a widow and a mother.

To remove some really deserving, but destitute families from this area of sin and death, the ladies connected with the Olive Plant have taken a house in Nineteenth street, near Sixth Avenue, in which they propose to locate permanently, and give employment to twenty poor families. Most of these are widows with children, who, by being thus removed from the contagion of bad example, will be trained to usefulness and virtue instead of ignorance

The Howard Home will be placed under the supervision of the Lady Howard and Chelsea Temperance So ciy, and only awaits a little pecuviary aid to receive and render comfortable one hundred souls. Some families are already there. Donations for the Howard Home will be received at 9 Spruce street, (office of the Olive Plant.)

IT Homenity .- DEAR SIR- A few months ago no thirg but a miracle could seem to reach my case, and if I

I know, sir that the prejudices of the public against specifies are so strong I cannot reasonably expect if you should spread my case before them, that many of them will even read it, much less make an experiment, but you are at liberty, however, to do it if in your judgement there are those whose prejudices are not too much set against all patent medicines to prevent them from giving what I have to say a candid hearing. But, hit or miss, here you

Last Jone I was taken with a severe fit of plearisy, which left me with a constant cough and a very free and offensive expectoration, so much prostrated as to be confined to the house, appetite poor, taste nearly lost, very severe night sweats. Shen lying on my right side I would strangle nearly to suffocation, a great share of the time I was under the necessity to rest and sleep sitting up, on account of pain and suffocation, I had regular Lecties every day, and was reduced in strength and emaciated much, attended with extreme weakness, my feet and hands were much swollen, I raised at least a pint of matter every day, which was offensive, sweetish to the taste and very sickening. I was very chilly and thirsty in the afternoon of each day. Dr. Eddy, of Staten Island, attended me, and succeeded in reducing the plaurisy, but the above fearful symptoms setting in, he said I had the consumption and was beyond cure. I inquired of him whether he could render me any permanent help, and he told me he could not. I had heard of the case of Rev. Redfield and Williams, of New York, and after availing myself of a knowledge of the effects of your Carminautis upon them. and a description of the cases which so clearly set forth my own I determined to try one bottle. After using balf af the first bottle, I found I was gaining a little strength. and my appetite began to increase, by the time I had used the whole bottle my night sweats and fever had left me entirely; after I had used 2½ bottles I threw off much blood, mucus and pus; there must have been a number of quarts; so great was the quantity that my friends thought vas impossible I could live after so much loss of blood. Dr. E. was immediately called, and thought I must now die. but from this I began to mend rapidly, and I now feel quite strong and able to walk the streets with little fatigue. I commenced taking this medicine last August and am still using it, and I do sincerely believe it will complete a perfeet cure from what it has already dine-
